

Cleaning

A Teaching Trust of the University of Birmingham
Safe & Effective | Kind & Caring | Exceeding Expectation

Cleaning the environment

The frequency of cleaning in the care home needs to increase across the home especially in the areas where there are COVID positive or suspected residents.

- Frequently touched surfaces should be cleaned at least 3 times a day:
 - Door handles.
 - Telephones.
 - Hand rails.
 - Toilets.

Cleaning products

- A combined detergent/disinfectant solution at a dilution of 1,000 parts per million available chlorine (ppm available chlorine (av.cl.) or a general-purpose neutral detergent in a solution of warm water followed by a disinfectant solution of 1,000ppm av.cl.
- Products must be prepared and used according to the manufacturers' instructions and recommended product "contact times" must be followed
