

# Knee brace

Orthotics

The prevention of infection is a major priority in all healthcare and everyone has a part to play.

- Please decontaminate your hands frequently for 20 seconds using soap and water or alcohol gel if available
- If you have symptoms of diarrhoea and/or vomiting, cough or other respiratory symptoms, a temperature or any loss of taste or smell please do not visit the hospital or any other care facility and seek advice from 111
- Keep the environment clean and tidy
- Let's work together to keep infections out of our hospitals and care homes.

This leaflet will go through how to care for your leg whilst wearing a knee brace, how to maintain your knee brace and who to contact if you have any problems.

## Care of your leg

You should do the following on a daily basis:

1. Inspect all aspects of your leg which come into contact with the knee brace checking for red marks, abrasions, bruising or wounds. Use a mirror or ask someone for help if necessary.
2. If you are experiencing discomfort or the skin is marked, red or broken, please contact the orthotics department immediately for advice.

## Wearing regime

This will be individual to each patient. Please follow the instructions written by the Orthotist in the table opposite.

## Review appointments and maintenance of your knee brace

Please check your knee brace for wear and tear daily, make sure there are no loose parts on your knee brace before donning it. Make sure (if appropriate) that the knee joint fully locks before donning your knee brace.

There are many different styles of knee braces; you will be given the most appropriate brace for your condition.

The orthotics department has an "open review" policy, which means you can contact us when you feel you need a review appointment. Your orthotist will advise you how often you should have your knee brace reviewed.

If you have any concerns regarding your knee brace please contact the Orthotics department directly to seek advice or request a review appointment.

Name of Orthotist: .....

Contact details: .....

## Wearing regime

Date	Length of Time knee brace should be worn
Day 1	
Day 2	
Day 3	
Day 4	
Day 5
