

Guide to buying footwear

Orthotics

The prevention of infection is a major priority in all healthcare and everyone has a part to play.

- ***Wash your hands with soap and warm water and dry thoroughly. Use hand gel, if provided, in care facilities.***
- ***If you have symptoms of diarrhoea and vomiting stay at home and do not visit relatives that are vulnerable in hospital or in residential care. You will spread the illness.***
- ***Keep the environment clean and safe. Let's work together to keep it that way. Prevention is better than cure.***

The aim of this leaflet is to help you recognise the features of footwear that will most likely offer a comfortable fit.

What shoes should I wear?

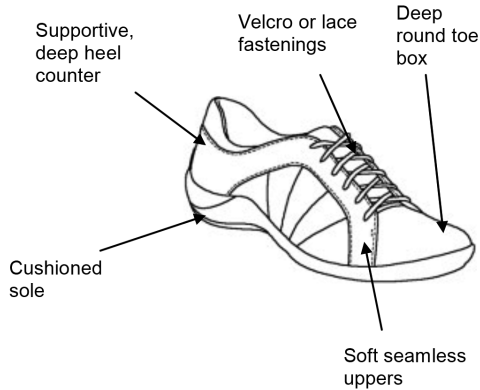

All feet are different but well fitting supportive shoes should improve the comfort of your feet. Shoes with the following features should be the most comfortable:

- Round or square toe shape with plenty of depth so your toes are not squashed.
- A low heel, ideally less than 30mm but more than 15mm high.
- A lace or Velcro fastening to hold the foot firmly without rubbing.
- Removable insoles especially if the hospital is providing an insole/orthosis.
- Soft, seamless uppers with supportive deep heel counters.
- Cushioned sole to absorb impact.

What size shoe should I wear?

The correct shoe size is essential for comfort and support. Ideally you should have your feet measured at the shoe shop.

- There should be 6-10mm space in front of the longest toe
- The natural shape of the shoe should not be distorted by the foot, this may indicate excess pressure on the toe joints.
- With the foot in the shoe, when moving a thumb or finger across the forepart of the footwear there should be a slight rippling of the material but not a significant crease that would indicate the shoe is too wide.
- The heel counter of the footwear should be neatly against the sides of the feet with no pressure on bony protrusions such as the ankle bone or the top of the heel curve.

When should I buy my shoes?

Your foot size can vary through the day. Try shopping later in the day, if your feet tend to swell they will be at their largest at that time.

Always buy shoes to fit your largest foot.

Shoes should be comfortable at the time of purchase, however, you should always break new shoes in slowly.

Where should I buy my shoes?

Many shops and footwear companies make wide fitting shoes and shoes which incorporate the features discussed, below is a list of some of these:

- Hotter (www.hottershoes.com)- often come with removable insoles
- Hush Puppies (www.hushpuppies.com) often come with removable insoles
- DB easy (www.dbshoes.co.uk), often come with removable insoles, widths from E to 8E
- Cosyfeet shoes(www.cosyfeet.com)
- Equity (www.equityshoes.com)
- Reiker Van Daal (www.vandalshoes.com)
- Rohde (www.rohdeshoes.co.uk)

- Padders (www.padders.co.uk), Birkenstock (www.birkenstock.co.uk)
- Safety Footwear- Arco: www.arco.co.uk • Wide range of brands of safety footwear
- Sevsafe: www.sevsafe.co.uk • Range of brands • Footwear is available in 4 widths
- Safe and Sound: www.snssafety.co.uk • Safety footwear in varying widths
- Wallis, Evans, Clarks, Marks and Spencer and New Look have a range of wide fitting shoes

Many of the ranges above are available at local shops and all are available on the internet.

The above shops, brands and companies have no links with the NHS and may change their styles and sizes meaning that some shoes may not fit as well as when we recommended them to you.
