

The Point of Care Foundation Schwartz Round's feedback - 6 monthly review form

This spreadsheet automatically calculates percentages from the data that you enter. Please complete all boxes that say 'required' and which are coloured blue.

Complete one spreadsheet for each Round using the tabs at the bottom. A summary of all Rounds will automatically be calculated in the Summary tab at the end.

There are also space for you to add additional comments.

The last tab will auto generate a report you can print off to show your organisation (please note, when printing, press fit to one page). This completed spreadsheet should be sent to the Point of Care Foundation once you have 6 Rounds worth of data. You will be sent a reminder email if we have not received this from your site. Please get in contact with us if you have any difficulty completing the form.

Please send your document to info@pocf.org.uk

Round 1 feedback

Number in attendance must be added in order for the calculations to be made.

Data entered represents actual numbers - for example if 30 forms were collected and on 3 of these, the 'completely disagree' column was ticked for one particular response then enter '3' in this column. On pressing return, the adjacent white box will automatically show 10%. Add '0' if nobody has ticked a box. Please don't leave any 'required' / blue boxes blank

Very insightful - thank you!
Very useful for when we become doctors!
Has outlined issues I felt very worried about and has improved my confidence
No email reminder of event - may be particularly important in view of differing days
Hijacked slightly by problem solving
Too medical
Nice to share experiences
As a student nurse I could relate to some of the issues raised by student doctors.
I think something should be organised for students and newly qualified nurses
Great Talk
Informal so easier to be part of
Came out feeling positive
Cant wait for more

Round 3 feedback

Number in attendance must be added in order for the calculations to be made.

Data entered represents actual numbers - for example if 30 forms were collected and on 3 of these, the 'completely disagree' column was ticked for one particular response then enter '3' in this column. On pressing return, the adjacent white box will automatically show 10%. Add '0' if nobody has ticked a box. Please don't leave any 'required' / blue boxes blank

Please add your comments and feedback on today's Schwartz Centre Round (optional)
It's a really good attempt.
Excellent presented, very relevant to my area of work. Great to hear such compassion and dedication from everyone.
Insightful and striking and quite emotional.
Very helpful and informative. Plenty of time for questions and answers.
Very well run given it is inevitably complex material and relatively new to RWT culture.
Can see the value in shared experience, I struggled with the lack of resolution or problem solving. Need to emphasise 'rules' of turning off phones - one colleague was scrolling texts and photos during the session.
Relaxed and open environment and very loving and caring atmosphere. It is really good to reflect and listen to other peoples' journeys and experiences.
Recent experiences made it difficult for me to actively contribute to discussion today but listening in did help as could relate to some of the discussion.
It was a very useful session particularly hearing about other HCA's experience of patient death particularly coming from the Palliative Care team. Maybe a good topic for the future could be "Sudden or Unexpected Death"?
I feel that introduction to purpose of these rounds in more detail would help to improve quality and focus on the objectives/outcome.
Good frank open discussion. Good participation from audience.

Round 4 feedback

Number in attendance must be added in order for the calculations to be made.

Data entered represents actual numbers - for example if 30 forms were collected and on 3 of these, the 'completely disagree' column was ticked for one particular response then enter '3' in this column. On pressing return, the adjacent white box will automatically show 10%. Add '0' if nobody has ticked a box. Please don't leave any 'required' / blue boxes blank

Interesting
Thought provoking
Gave me time to think about listening, challenging and changing things in my work
Brilliant!! Very supportive environment supported by other colleagues well
Multidisciplinary
Really useful SR today.
Very insightful
I think it would be helpful for these sessions to be held at different times and different locations to allow as many people as possible to attend
Relevant, time to share own experiences
Excellent again to hear other colleagues in this forum
Honest open conversation - refreshing - multi professional values (Trust /Respect for Roles/Understanding)
Very comfortable environment to share experiences
Very useful taking time to reflect on experiences
Well done Louise. You are a star

Both stories presented and group interaction emotional and thought provoking
The role of swan
I think it is helpful to shift the days and times of the round so that everyone has the opportunity to attend. There is only one lunchtime a week where my timetable enables me to attend

Interesting
Thought provoking
Gave me time to think about listening, challenging and changing things in my work
Brilliant!! Very supportive environment supported by other colleagues well
Multidisciplinary
Really useful SR today.
Very insightful
I think it would be helpful for these sessions to be held at different times and different locations to allow as many people as possible to attend

Relevant, time to share own experiences
Excellent again to hear other colleagues in this forum
Honest open conversation - refreshing - multi professional values (Trust /Respect for Roles/Understanding)
Very comfortable environment to share experiences
Very useful taking time to reflect on experiences
Well done Louise. You are a star
Really useful - as a student it is good to know that others more experienced have similar thoughts/feelings/concerns - Thank You
Useful insights
Thank you
Very interesting and great to hear discussions on this big issue
Relevant to my post as we assess home environment to ensure safe discharge
