

What is a concealed raise?

This is a **NON-concealed raise**, when a shoe is adapted using this method, the raise is added on to the bottom of the sole unit.

This is a **concealed raise**, when a shoe is adapted using this method, the sole unit is split open and the raise is added to the shoe and the sole unit is then placed on top of the raise, please note not all shoes are suitable for a concealed raise, please speak to a member of the orthotics team for more information.
